2026 (F) Revenue **\$5.3M**
 2026 (F) Adj. EBITDA **\$2.0M**

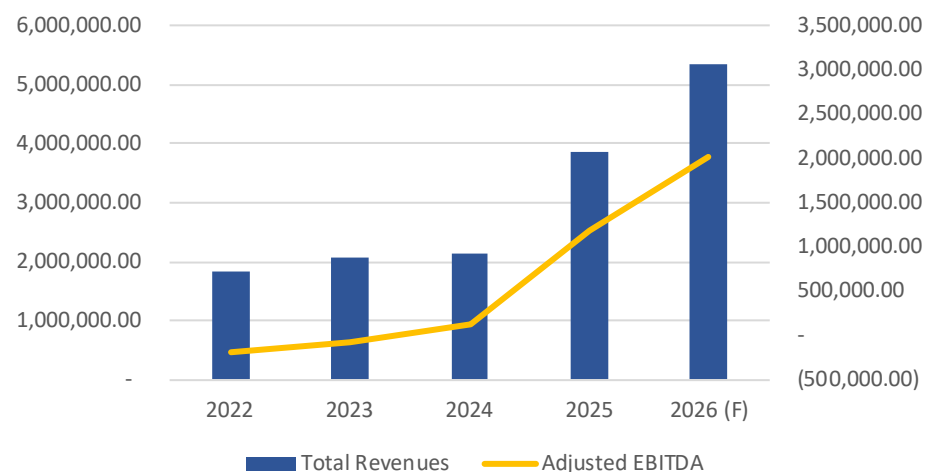

2025 Revenue **\$3.8m**
 2025 Adj. EBITDA **\$1.1M**

Overview

Project Rectifier is a long-established electro plating business with a focus on zinc plating. In operation for over 75 years, Project Rectifier holds a prominent presence in the West Coast plating industry, consistently delivering high-quality products to a diverse customer base. Project Rectifier offers competitive pricing and a level of service that is the envy of the metal finishing industry. They have some of the largest zinc plating tanks located on the West Coast.

Project Rectifier is a strategically situated operating facility that holds highly coveted permits and licenses that allow it to operate. Riding the recent boom in the AI and data center market, Project Rectifier is in prime position to grow alongside these emerging markets.
